A Member of the Berger Group

Florin Niculescu

I confirm that Florin Niculescu has worked for me as a Design Engineer / Assistant Senior Resident Engineer on the Project M7 (Volga) Highway Rehabilitation. Moscow - Nizhni Novgorod- Kazan for 6 months between May and November 1997. The Project has involved the extensive rehabilitation of 200 km of existing two and four lane road as well as the preparation of 12 km of new road, which required the widening of an existing two lane road to four lanes.

Mr. Niculescu has been involved in assisting the Senior Resident Engineer in the central office, to supervise four Civil Engineering Contracts valued at over \$34M. In particular he has overseen specific works such as guardrails, signs and road markings, etc. including wholesale redesign, preparation of documents and extensive Liaison with the Police and Contractor.

He has also prepared the vertical alignment and produced cross sections for the new design using Micropiste and Autocad, interfacing with MOSS. In addition he has acted as Liaison with the local design team and has produced cost estimates and Bills of Quantities.

Throughout the time of his work he has always been conscientious and hard working, often working late and at weekends. His technical knowledge has been excellent and his computer skills are first class. He has been an invaluable member of the team, in circumstances that have often been difficult and demanding. I would have no hesitation in recommending him for similar positions in the future.

A handwritten signature in blue ink, reading 'A.J. Stein', with a long horizontal flourish extending to the right.

A.J. Stein
Senior Resident Engineer
Louis Berger International Inc., Moscow
